

JULIAN MALINA
Software Engineer
Colonie, NY | (518) 951-9005 | jmalina7897@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 6 years of professional experience, including 4.5 years building multiplayer systems, SDKs, and backend tools for both AAA and smaller studios. Skilled in C++, C#, Go, Unity, Unreal Engine, and cloud services (AWS/GCP), with experience developing matchmaking, anti-cheat, and networking solutions at scale.

TECHNICAL SKILLS

Languages: C++, C#, Go, Java, Python

Engines/Frameworks: Unity, Unreal Engine, .NET, WPF, Qt

Networking/Cloud: AWS, GCP, SQL, REST APIs, Multiplayer Networking

Tools & Source Control: Git/GitHub, Perforce, Jira, Agile/Scrum, Swarm

Operating Systems: Windows, Linux

EXPERIENCE

Software Engineer II - Wolfjaw Studios

July 4th 2021 - Present

- Designed and implemented matchmaking and server hosting SDKs for **Unity** and **Unreal Engine**, enabling integration across multiple games and internal tech demos.
- Created demo projects to validate SDK usability and improve developer workflows.
- Developed and customized matchmaking algorithms to client specifications, including integration into *Nerf VR*. Supported QA testing for this process.
- Deployed and supported Open Match matchmaking backend services using **Go**.
- Built out and experimented with scalable cross-game anti-cheat systems and analytics tools which supported 300k+ concurrent players at peak load.
- Migrated legacy internal tools to modern applications using **C#/.NET** and **WPF**, with backends connected to **GCP, AWS, and SQL**.
- Integrated third-party **voice chat SDKs** into multiplayer game pipelines.
- Facilitated design analysis sessions and ran internal playtests to validate gameplay systems and technical solutions.
- Used **Git/GitHub** for SDK development and **Perforce** for client-side game integration, ensuring smooth collaboration across distributed teams.

Software Engineer, Northrop Grumman

January 6th 2020 – June 18th, 2021

- Collaborated in an **agile, multi-team environment** to deliver tools and features used across real-time battlefield simulation hardware platforms.
- Helped establish a company-wide standard for storing large files using **GitHub LFS**, improving workflow efficiency and consistency across teams.
- Updated and re-implemented existing tools based on user feedback, aligning them with new design and usability specifications.

EDUCATION

SUNY Buffalo, Buffalo, NY

Spring 2020

Combined Bachelors/Masters Degree in Computer Science Engineering
